

NEHA JOSHI

Senior PHP/Full-Stack Developer | Laravel | REST API Architecture

Dehradun, India | +91-7819995181 | jneha2396@gmail.com | [linkedin.com/in/neha-joshi-8b0395169](https://www.linkedin.com/in/neha-joshi-8b0395169)

PROFESSIONAL SUMMARY

Senior PHP/Full-Stack Developer with **6+ years** engineering scalable web applications, CRM platforms, and high-throughput RESTful APIs serving **50K+ daily requests**. Core expertise in **PHP 8, Laravel, MySQL performance tuning**, and end-to-end SDLC delivery. Achieved measurable business outcomes: cut API latency from **~400 ms to ~300 ms** (25%), reduced critical database query times from **~1.2 s to ~780 ms** (35%), and eliminated **~1,800 monthly support tickets** (40% reduction, est. **\$11K/month cost savings**) through automated order-tracking notifications. Led architecture decisions, enforced code-quality standards, and mentored junior engineers across Agile/Scrum teams.

TECHNICAL SKILLS

Backend	PHP 8, Laravel (Eloquent, Queues, Horizon), CodeIgniter, Node.js, OOP, SOLID
Frontend	HTML5, CSS3, JavaScript (ES6+), jQuery, AJAX, JSON, XML
Databases	MySQL (query optimization, indexing, partitioning, schema design), Redis, MongoDB
APIs	RESTful API Design & Versioning, OAuth 2.0, Third-party API Integration, Webhooks
DevOps & Tools	Git, Bitbucket, Docker, CI/CD Pipelines (GitHub Actions), Jira, Agile/Scrum
Architecture	MVC, Repository Pattern, Service Layer, Event-Driven Design, Database Normalization

PROFESSIONAL EXPERIENCE

Backend Developer | Digital Regenesys Pvt. Ltd.

Mar 2024 - Dec 2025

- Engineered 8 CRM modules (lead management, pipeline tracking, reporting dashboards) in PHP 8 / Laravel, automating manual workflows and **saving the 10-person sales team ~160 hours/month** in data entry and follow-ups
- Optimized 12 high-traffic RESTful API endpoints by refactoring N+1 queries, introducing Eager Loading, and adding Redis caching — **reduced P95 API latency from ~400 ms to ~300 ms**, handling 50K+ daily requests with 99.9% uptime
- Architected AJAX-driven, JSON-powered front-end components (real-time search, inline editing, dynamic dashboards), **cutting page interaction times by ~40%** and reducing full-page reloads to near zero
- Partnered with product, design, and QA across 24 Agile sprints — owned code-review standards, maintained CI/CD pipelines (GitHub Actions), and enforced >85% unit-test coverage via PHPUnit
- Established MVC + Repository Pattern conventions across the codebase; authored internal style guide adopted by 6 developers, reducing PR review cycles from ~3 days to ~1 day

Senior PHP Developer | Sieva Networks Pvt. Ltd.

Apr 2022 - Mar 2024

- Designed and deployed 15+ REST API services in PHP/Laravel powering a high-traffic B2B platform processing **~2K transactions/day** with 99.95% uptime
- Reduced critical reporting-query execution from **~1.2 s to ~780 ms** (35%) across **500K+ database records** through composite indexing, query plan analysis (EXPLAIN), and strategic denormalization
- Spearheaded performance-tuning and refactoring initiatives that **cut production incidents by 60%** (from ~10/month to ~4/month) and reduced mean-time-to-recovery from 45 min to 15 min
- Architected MySQL schema redesign (partitioning, covering indexes) supporting **3x data-volume growth** without degradation — scaled from 200K to 600K+ records with sub-second query response
- Mentored 3 junior developers through structured code reviews and pair programming, **reducing their average bug rate by 45%** within 6 months

PHP Developer | BAMKO India Pvt. Ltd.

Jan 2019 - Dec 2021

- Developed 20+ reusable backend modules in PHP/CodeIgniter following OOP and SOLID principles, **reducing new-feature development time by ~30%** through standardized service layers
- Integrated AJAX and JavaScript-driven interfaces achieving cross-browser compatibility across Chrome, Firefox, Safari, and Edge — **zero critical UI bugs in production** over 18 months
- Implemented PHPUnit test suites covering 70%+ of critical business logic, **reducing regression bugs by 50%** during quarterly release cycles

- Maintained and modernized 3 legacy PHP 5.6 systems to PHP 7.4, ensuring **zero-downtime migrations** with backward-compatible API contracts; improved load times by ~25%

KEY PROJECTS

E-Commerce Real-Time Order Tracking API (PHP, Laravel, MySQL, REST API, Webhooks)

- Engineered real-time courier tracking integration consuming 3 third-party logistics APIs (webhooks + polling fallback), delivering live order-status updates to **~1,000 orders/day**
- Eliminated **~1,800 monthly "Where Is My Order?" support tickets** (40% reduction) through fully automated email/SMS delivery notifications — estimated **\$11K/month** in support-cost savings (at ~\$6/ticket industry average)

Copper Artefact Business Management System (PHP, MySQL, CodeIgniter)

- Automated end-to-end inventory management, vendor tracking, and invoicing workflows — **processing 500+ SKUs** and **200+ vendor records** with automated validation pipelines
- Reduced manual data-entry errors by **85%** and cut monthly reporting time from **~12 hours to ~2 hours**, freeing operations team for strategic work

EDUCATION

B.Tech — Computer Science & Engineering

Uttarakhand Technical University | 2014 - 2018

CERTIFICATIONS

- **Microsoft Technical Associate (MTA)** — Database Fundamentals
- **Java & Advanced Java** — RCPL India
